OBJECTIVE

Cybersecurity student with hands-on exposure to both offensive and defensive security, including digital forensics and secure system design. Interested in vulnerability assessment, threat detection and applying security principles like OWASP Top 10 to real-world scenarios.

EDUCATION

BtechinComputerScience (Cybersecurity) - NMAMIT | Nitte University (Pursuing) - CGPA: 7.5
Pre University - Janatha Independent PU College | Karnataka Board (2023) - CGPA: 9.54

PROJECTS

NetSentinel: Automatic Real-Time Network Monitoring System

- Built an intelligent issue classification system using Machine Learning and NLP to automatically categorize technical support tickets based on issue descriptions.
- Developed predictive models for issue prioritization and workflow optimization, improving response efficiency and reducing manual intervention.
- Technologies: Python, Scikit-learn, Pandas, NumPy, NLP, Machine Learning

Auto Decryption System using Classical Cryptography

- Developed a Python-based automated decryption system capable of detecting and decrypting encrypted text using classical cryptographic algorithms such as Caesar, Vigenère, and Substitution ciphers.
- Implemented pattern recognition and frequency analysis techniques to identify cipher types and improve decryption accuracy and efficiency.
- Technologies: Python, Classical Cryptography, Frequency Analysis, Pattern Matching

ACHIEVEMENTS

- Secured 3rd Place (2nd Runner-Up) in Cybersiege 2026, a 24-hour Capture The Flag (CTF) cybersecurity competition conducted by Alva's Institute of Engineering & Technology.
- Completed NPTEL certification course on Internet Crimes and Cyber Security, gaining foundational knowledge in cyber threats, online crime investigation, network security, and cybersecurity best practices.
- Completed NPTEL certification course on Systems and Usable Security, gaining foundational knowledge in system security principles and user-centric security design.
- Completed AINNOVATION 2025: Microsoft Azure Learning Challenge, gaining practical knowledge in Cloud Computing (Azure) and Artificial Intelligence (AI) through Microsoft's learning initiatives.

SKILLS

- **Technical Skills:** Python, HTML, CSS, JavaScript, React.js, APIs
- **Core Skills:** Problem-Solving, Communication & Team Collaboration
- **Cybersecurity Skills:** OWASP Top 10 (basic), SQL Injection, XSS, Phishing concepts, VAPT fundamentals, CTF-based problem solving

LANGUAGES

English, Hindi, Kannada
